## Steps to Complete on Your HP Desktop

Setting Up AnyConnect VPN on Windows

1. Download the **AnyConnect VPN Client** software by clicking the link under these instructions.

2. Run the setup program. Click **Next.**

3. To continue you need to **accept** the licence agreement, then you can click **Next**. Click **Install**. You might be asked for permission, so make sure that you allow it.

4. When setup completes, click **Finish.**

[AnyConnect 4.8 (Windows)](#)

Connecting to AnyConnect VPN on Windows

1. Click 🪟 , then click on **Cisco AnyConnect Secure Mobility Client**. (You may need to look under **All Programs** or **Programs**.)

2. You'll get a little window coming up at the bottom right of your screen. The white box will normally be blank the first time you run the program. Type in **anyconnect.brunel.ac.uk** into it. (If it already says Staff or Student then leave it as it is.)

3. Click **Connect**. Then enter your Brunel network username and password when prompted.

4. You will then get a message saying that you are connected. The AnyConnect window will minimise and its icon will show a little padlock on it to show that it is connected.

Disconnecting from AnyConnect VPN on Windows

1. Double-click on the little icon with the padlock and this will bring up the AnyConnect window. Click **Disconnect.**
